FACULTY POSITION

The Department of Environmental Engineering at the Middle East Technical University invites applications for faculty positions in Environmental Engineering. The applicant must have a Ph.D. degree in Environmental Engineering or related field at the time of appointment.

The potential for high quality teaching and research with outstanding record of publications are sought. The position is open to candidates that can prove demonstrated ability in all focus areas of the Environmental Engineering discipline. The successful candidates are expected to teach and develop graduate and undergraduate courses, supervise master and doctoral students, acquire research programs related to the mission (<http://www.enve.metu.edu.tr/>) of the Department, seek external funding for research and establish full commitment for outreach activities and professional service.

Applications will be accepted until the position is filled. Applicants are required to submit a curriculum vitae, copies of published manuscripts in peer-reviewed scientific journals, statement of research and teaching interests, and names and contact information of three references. Required application materials in electronic format should be sent to kunlu@metu.edu.tr.
