## 1. ABOUT CLIMATE BALANCED

Climate Balanced is a climate change consultancy firm that provides services in environmental commodity markets through carbon offset project development, renewable energy certification execution, carbon and renewable energy certificate trading and climate policy analysis activities.

Climate Balanced helps businesses achieve net zero and carbon neutrality goals with its market-based decarbonization services. With the technical consultancy services provided, while converting emission reductions achieved by activities such as renewable energy, waste disposal, afforestation, energy efficiency, and cooking stove distribution into carbon credits or renewable energy certificates, greenhouse gas emissions caused by businesses are priced using these emissions with financial value.

Below is a summary of the services offered by Climate Balanced:

- Development of carbon offset projects under international standards such as Gold Standard, VCS, GCC, and Cercarbono.
- Development of renewable energy certification projects in mechanisms like I-REC and GO.
- Conducting spot and forward market trading activities for commodities like carbon credits and Renewable Energy Certificates (such as I-REC and GO).
- Article 6 Compliance and Certification (including project development and other mechanisms).
- Article 6 Policy Analysis.
- Greenhouse gas monitoring, reporting, and verification (MRV) Policy Analysis.
- Policy analysis of carbon markets (Carbon Tax, ETS, and other pricing mechanisms).
- Compliance and capacity building services for Border Carbon Adjustment (BCA).
- Compliance and capacity building services for the civil aviation sector under CORSIA.
- Carbon footprint calculation and reporting.

**Climate Balanced Global Business Footprint**

## 2. JOB DESCRIPTION

**Climate Balanced is looking for a “Carbon Market Specialist” to work in carbonmarkets domain for:**

-  Carbon offset project development and reporting (i.e., listing, validation, verification and standard specific reporting) for different activities including but not limited to conventional renewable energy, waste to electricity, agriculture and community-based project (i.e., safe water access, clean cooking and solar lighting in emerging nations) under recognized schemes such as Gold Standard, Verra, International Carbon Registry (ICR), Cercarbono, Global Carbon Council, BioCarbon Standard and Article 6 Mechanisms by UN Climate Change
-  Energy Attribute Project development and reporting (i.e., mainly #I-REC by certification)
-  GHG & Sustainability Reporting under recognized schemes such as Global Reporting Initiative (GRI), CDP, Science Based Targets initiative, ISO - International Organization for Standardization, FSB Task Force on Climate-related Financial Disclosures (TCFD), SASB Standards and many others
-  Capacity building (i.e., climate policy analysis and training on climate change and carbon pricing)

**It shall be noted that the position will accept applications of candidates that meet the requirements defined as follow:**

-  Being fluent (write, read and speak) in English and Turkish
-  Having notice period no more than 1 month
-  Having strong reporting and communication skills
-  Having no travel restrictions
-  Residing in Ankara

**The following qualifications and conditions will be plus:**

-  Having experience in carbon offset project development
-  Having experience in working for projects in Africa and Middle East
-  Having experience in financial modelling for energy projects

The preferred disciplines for this position are as follow: **Engineering** (primarily chemical, environmental and energy) and **Economics**

### 3. APPLICATIONS

Interested candidates are invited to submit their CVs and Cover Letters in English to the following email accounts: [oguz@climatebalanced.com](mailto:oguz@climatebalanced.com) & [trading@climatebalanced.com](mailto:trading@climatebalanced.com)
