

A JOURNEY BACK: FROM STUDENT TO SCHOLAR

In this seminar, I will reflect on the journey that began within the walls of METU EE, where I completed my undergraduate studies. I will share how the foundational experiences and education I received in different institutions shaped my professional and academic pursuits.

The talk will cover key milestones in my career, including my transition into research and my current focus areas. Through discussing my previous projects and interdisciplinary collaborations, I hope to offer insights and inspiration drawn from my own story.
