# WE'RE HIRING

## JOB DESCRIPTION

We are seeking a motivated Junior Civil / Environmental Engineer to join our dynamic team. The successful candidate will primarily focus on projects related to climate change impact assessments, remote sensing applications, and hydrological/climate modeling. Additionally, the role involves contributing to ongoing projects within the environment and water resources sector.

## Job Title

***Civil / Environmental Engineer***

(Hydrology, Climate Change, Remote Sensing, and Modeling)

## Key Responsibilities:

- ▶ Conduct climate change impact analyses and contribute to adaptation strategies.
- ▶ Apply remote sensing and GIS techniques for environmental and hydrological assessments.
- ▶ Develop and run hydrological or climate models to support project objectives.
- ▶ Collaborate with team members on technical reports and deliverables.
- ▶ Provide support for other existing projects within the water and environment division as needed.

## Requirements:

- ▶ Bachelor's degree in Civil Engineering, Environmental Engineering, or a related field (Master's degree is a plus).
- ▶ Interest or initial experience in climate change, hydrological modeling, or remote sensing.
- ▶ Strong analytical and problem-solving skills.
- ▶ Basic knowledge of relevant software/tools
- ▶ Good communication skills in English, both written and verbal.
- ▶ Ability to work independently as well as in a collaborative team environment.
